

# THIS FIELD GUIDE BELONGS TO:

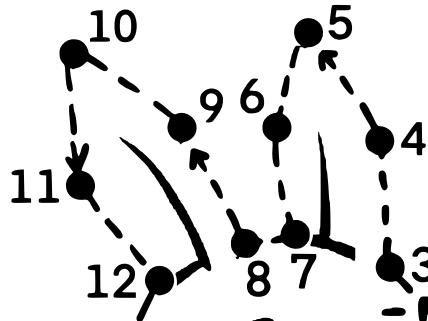

---

Explorer name goes here! Add your best signature or a fun drawing of yourself!

# HOW TO COMPLETE THE DOT-TO-DOT PUZZLES

The puzzle is complete when you reach the highest number you can find!

Begin connecting the dots one by one as you count as high as the numbers in the puzzle go to finish the image!

If the last number ends near the first number, you can connect them together to complete the picture!

Start here!

- 1** Find dot "1" and start there, using a marker, crayon, pencil or drawing tool of your choice to connect dots in order
- 2** Connect the dots around the outline until you reach the highest number you can find to complete the finished diagram
- 3** Observe the newly-discovered creature and give it a unique "Specimen Name" based on its features and the given observations

DON'T FORGET TO COLOR IN YOUR NEW DISCOVERY AND THEN USE THE "FIELD NOTES" PAGE ON THE BACKSIDE OF YOUR DRAWING TO ADD OTHER IMAGINATIVE DETAILS!

# WELCOME, EXPLORER!

You're holding a very special field guide — one filled with strange and wonderful creatures that no one has ever seen before.

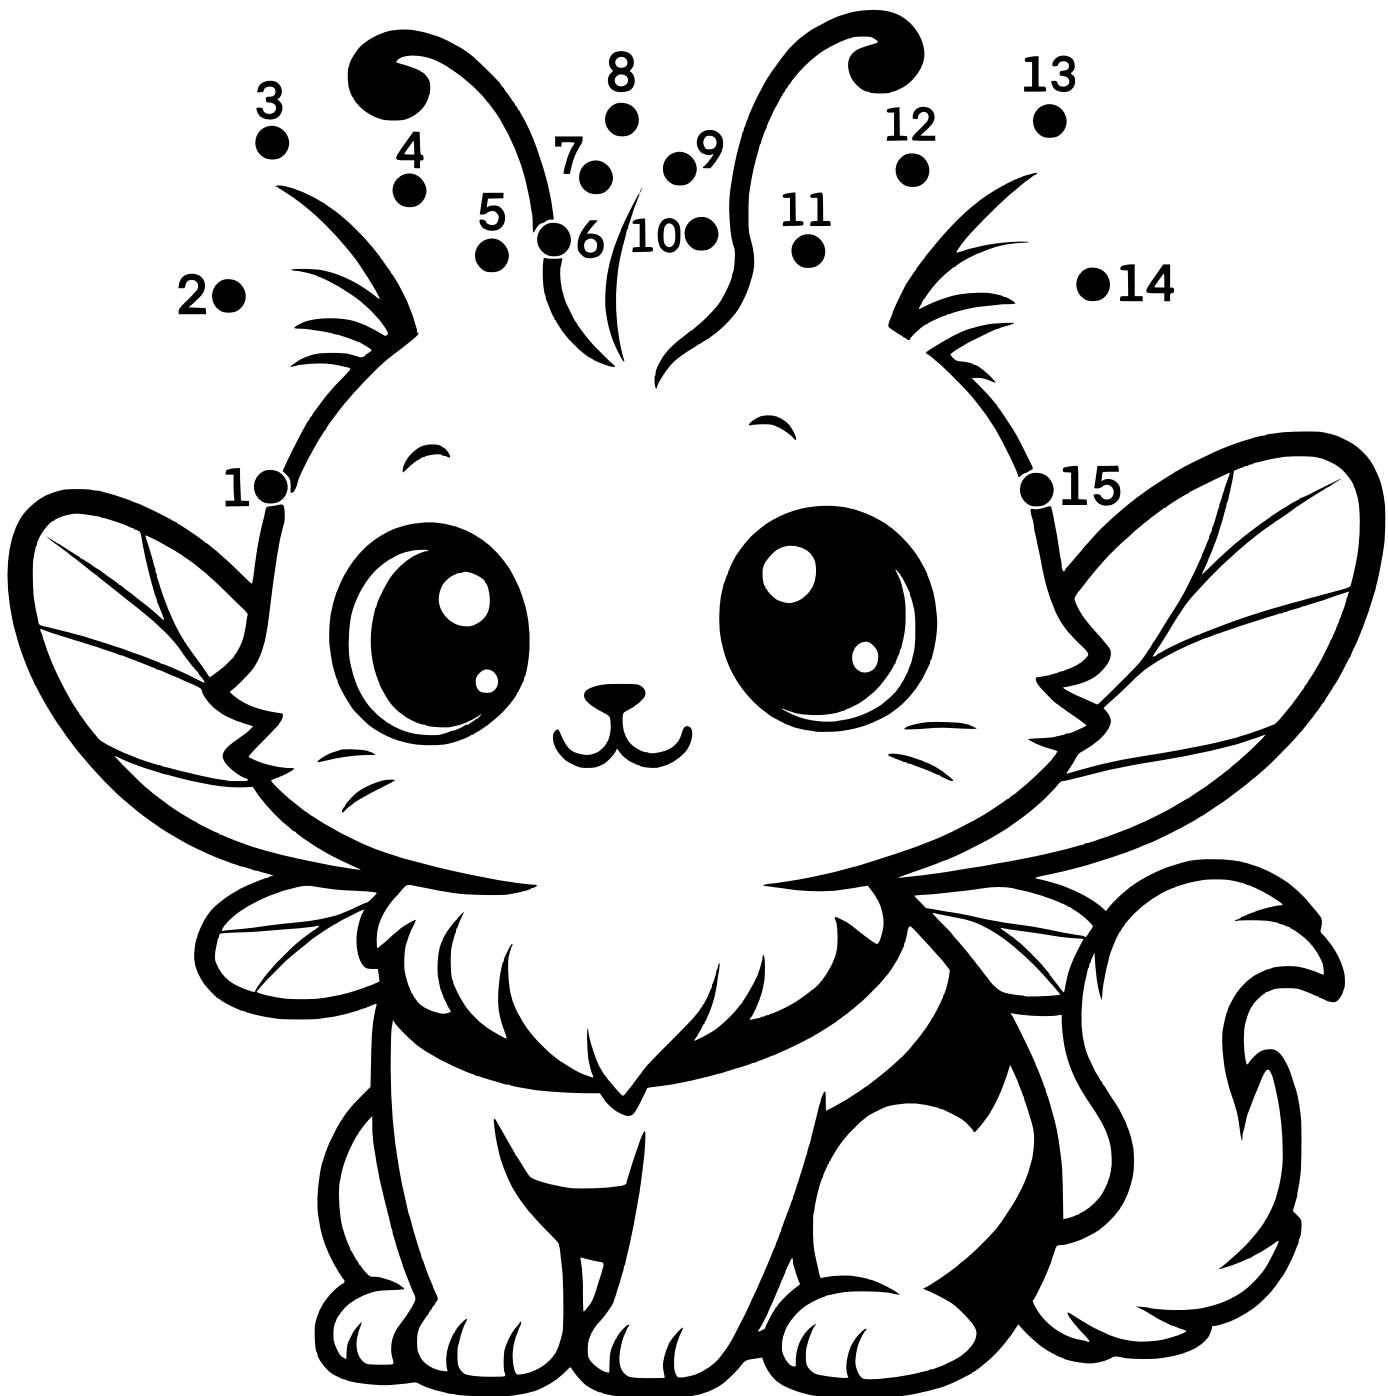

In this first section, you'll uncover the first set of 20 mysterious hybrids. Connect the dots to complete each creature. Then observe them closely and give each one a name! Finish the first set to earn your first badge!

THIS AMAZING JOURNEY

**Observations:** Spotted gently buzzing around a cluster of dandelions, then curling up on a sun-warmed rock for a midday nap. Tiny pawprints and bits of pollen were later found in a perfect circle around the spot.

**Specimen name:** \_\_\_\_\_
